Task-6

Develop a code to Read Data of Xml File (use ds.Read() Method) and print the same in console application

```
<CUSTOMER>
        <CUST>
                <CUSTID>C001</CUSTID>
                <CUSTNAME>RAJ SHARMA</CUSTNAME>
                <CUSTADDRESS>BANGALORE</CUSTADDRESS>
                <PHONE>9967564497</PHONE>
        </CUST>

        <CUST>
                <CUSTID>C002</CUSTID>
                <CUSTNAME>VIJAY SHARMA</CUSTNAME>
                <CUSTADDRESS>BANGALORE</CUSTADDRESS>
                <PHONE>9967564497</PHONE>
        </CUST>
</CUSTOMER>
```
